

The first Mobile eSports loyalty platform utilizing the speed and security of the Waves Blockchain

The global eSports economy is forecast to reach \$906 million in 2018 with over 350 million eSports enthusiasts expected to view an eSports event, league or global championship by the end of the year.

Mobile eSports continues to grow at a record pace even without a recognised tournament framework or an identifiable market leader.

RewardMob is a Mobile eSports tournament platform powered by Blockchain technology. Players can earn RewardMob loyalty tokens (RMOB) by unlocking rewards in mobile games that feature the RewardMob tournament technology.
